

LEATHER SINCE 1933

Apollo

In-stock and ready to ship within 2-3 business days

Apollo is produced from European, hand-selected bull hides. Fully treated in a drum-dyeing process, Apollos' surface evokes an ethereal sense of perfection while meeting all FAR 25.853 testing requirements. The smooth surface of Apollo is created by using a hair-cell print, applied during the final step of finishing. This leather exhibits extremely favorable edge-wear characteristics.
