

LEATHER SINCE 1933

Eden

The world's first leather to receive a Declare label. Eden is an olive tanned leather that uses fallen olive leaves to tan the hides. It is an exquisite full-grain semi-aniline leather designed on the finest selection of South German raw material. Eden offers rich uniform color and a soft, luxurious hand while the surface showcases a supple, drapery texture and a sophisticated matte finish. Eden is part of our Olive Tanned collection and is Declare, Red List free. The Olive Tanned collection was the winner IIDA/HD Product Design Competition – 2017
