

LEATHER SINCE 1933

Notting Hill Metallic

- Inspired by a beautiful oxidized copper roof in Sonoma, the new metallic leathers in our Notting Hill collection feature a pearlescent finish that imparts the surface with a subtle metallic sheen. With their warm glow and slight shimmer, these leathers exude a subdued elegance while retaining the soft, buttery hand that is a signature characteristic of Notting Hill.

FEATURES

- Aniline dyed
- Subtle metallic finish
- Soft hand
- Lightly polished surface
