

LEATHER SINCE 1933

Orion

Designed on the finest selection of South German cow hides, Orion is an exquisite semi-aniline leather that offers rich, uniform color and soft, luxurious hand. During tanning, an assortment of water-based mineral agents are used to impart the surface with a supple, drapery hand and sophisticated matte finish. Premium dyes are also utilized to ensure superior color translation and color consistency across the hide. The collection's extensive palette of 120 different colors offers aircraft designers the freedom of color choice in a high-performance, premium-quality semi-aniline leather. Additionally, excellent cutting yields and ease of clean ability add to Orion's enticing appeal, making it an ideal option for modern day applications.
