

LEATHER SINCE 1933

Potomac

Potomac is a full grain aniline leather tanned in Northern Italy on English hides averaging 50 square feet. During the tanning process, a hot wax is applied to the leather with a cylinder to create a slightly polished surface. Hides are then milled overnight in old wooden tanning drums to soften and mellow the leather's collagen fibers and impart it with remarkable suppleness. The end result is a leather with a bold, naturally milled grain and rich pull-up effect that will tailor beautifully in a variety of upholstery applications.

FEATURES

- Bold, naturally milled grain
- Rich pull-up effect
- Marked by casual elegance
