

LEATHER SINCE 1933

Terra

Crafted in Spain in a palette of bright and vivid colors, Terra is an olive tanned leather with a more natural aesthetic that showcases all of the inherent characteristics of the hides. After tanning, hides undergo a natural, open-air drying process and are then finished with natural oils with water-soluble lacquer bases. The end result is a vibrant leather with a soft, drapery hand and a stunning polished surface. Terra is part of our Olive Tanned collection and is Declare, Red List free.

The Olive Tanned collection was the winner IIDA/HD Product Design Competition - 2017. Learn More About the Olive Tanned Collection. **Small minimum order quantities may apply.**
